Healthcare Recoveries and Health Decisions, Inc. Announce Partnership

LOUISVILLE – Healthcare Recoveries, the health care division of Trover Solutions, Inc., the largest claims recovery specialist in the United States, and Health Decisions, Inc., a pioneer in the development of software technology that electronically audits 100% of paid claims have entered into a partnership that sets a new standard in Overpayment Recoveries.

Under the terms of the agreement, Healthcare Recoveries will exclusively use Health Decisions' proprietary technology to prepare clients' raw data for data mining and then mine the data for a broad spectrum of overpayment recovery opportunities, using both standard and client-specific recovery modules. Health Decisions will offer its overpayment software suite to insured plans (insurers, Blue Cross Blue Shield and HMOs) exclusively through Healthcare Recoveries.

Healthcare Recoveries will employ its industry-leading processes to verify overpayments, collect amounts due and remit recovered dollars to clients.

Mark J. Bates, HRI's EVP – Overpayment Operations said, "HDI has distinguished itself by developing discrete logic in more than 40 recovery modules to identify overpayment opportunities for health plans. HDI's capabilities are unique in the market. We expect their expertise, coupled with our investigation and collection capabilities, to result in substantial recovery enhancements for our clients.

Si Nahra, HDI's President said, "HDI offers a depth and breadth of claim review to HRI's clients that not only increases their recovery potential, but will also result in the creation of a new data asset of warehoused claims, integrated in compatible formats, which will substantially increase the amount of management information available, while retaining full compliance with HIPAA." HDI expects to launch a web portal in the summer of 2008 that will provide secure access to this management information.

HRI and HDI will collaborate on a full range of Overpayment services including: Coordination of Benefits, Medicare Primary Payer, Provider Billing Error, Payment Verification and Enrollment Verification. In addition to the 40+ specific recovery modules used for these services, clients can also work with us to customize overpayment analyses unique to their business.
